

Planning your Dairy Project with

A guide to make sure you cover all the bases when planning a new dairy.

The decision to build a new dairy is likely something that you have thought long and hard about. The financial implications, the detail required to get “just what you want” and the questions will just keep coming, “where do I put it”, “how big does it need to be”, “how do I coordinate the contractors”, and most importantly “can I finish it on time and on budget”.

Farming is your business, building dairies is ours.

We can take your ideas and turn them into reality. From offering advice on all aspects of the dairy to coordinating the entire project, we can help. Below is a quick reference guide outlining the elements that should be considered. Please feel free to discuss your requirements with our experienced sales team
